

COMPANY DATA

SmartSupport AI · Knowledge Base Document

1. COMPANY OVERVIEW

Q: What is SmartSupport AI?

A: SmartSupport AI is a SaaS-based customer support platform designed to help businesses automate customer service using artificial intelligence. It allows companies to handle customer queries, manage support tickets, and provide instant responses through an AI assistant trained on company-specific data.

Q: What problem does SmartSupport AI solve?

A: SmartSupport AI solves the problem of slow and inefficient customer support systems. Many businesses struggle to respond to customer queries on time, leading to dissatisfaction. This platform automates responses using AI while also providing human ticket support when necessary.

Q: Who can use SmartSupport AI?

A: SmartSupport AI is designed for businesses of all sizes including startups, e-commerce stores, service providers, and enterprises that want to improve customer support efficiency and reduce manual workload.

2. AI ASSISTANT BEHAVIOR RULES

Q: How should the AI assistant behave?

A: The AI assistant must behave as a company-specific support agent. It should only answer questions based on provided company knowledge and should not generate external or unrelated information.

Q: What should AI do if it does not know an answer?

A: If the AI does not find relevant information in the company knowledge base, it must respond by saying that it does not have enough information and suggest the user create a support ticket for further assistance.

Q: Can AI answer general world questions?

A: No, the AI must strictly answer only company-related queries. It should avoid answering unrelated general knowledge, political, or external informational questions.

3. TICKETING SYSTEM

Q: What is a support ticket?

A: A support ticket is a formal request created by a user when they are facing an issue that the AI assistant cannot resolve. It is handled by human support staff for detailed assistance.

Q: When should a user create a ticket?

A: A ticket should be created when the AI assistant fails to resolve the issue, when the problem is technical in nature, or when the issue requires manual review by support staff.

Q: What is the response time for tickets?

A: The standard response time for support tickets is between 24 to 48 hours depending on the priority level of the issue.

Q: What are ticket priority levels?

A: Tickets are categorized into three priority levels: Low, Medium, and High. High priority tickets are urgent issues affecting system functionality, while low priority tickets are general inquiries.

4. SERVICES AND FEATURES

Q: What features does SmartSupport AI provide?

A: SmartSupport AI provides AI-powered chat support, ticket management system, user authentication system, dashboard analytics, and automated response generation based on company knowledge.

Q: What plans are available?

A: SmartSupport AI offers three main plans: Basic, Pro, and Enterprise. The Basic plan includes AI chat and ticket creation. The Pro plan includes advanced analytics and priority support. The Enterprise plan includes full customization, API access, and dedicated support.

Q: Can companies customize the AI?

A: Yes, companies can customize the AI behavior by uploading their own knowledge base documents, FAQs, and policies to train the system according to their business requirements.

5. ACCOUNT AND AUTHENTICATION

Q: How does user authentication work?

A: Users authenticate using email and password. After successful login, a JWT token is generated which allows secure access to protected routes within the system.

Q: How long does a session last?

A: User sessions last for 1 hour after login. After expiration, users must log in again to continue accessing the system.

Q: Is user data secure?

A: Yes, all user passwords are securely hashed and authentication is managed using secure JWT tokens. Sensitive data is never exposed to the client.

6. REFUND AND POLICY RULES

Q: What is the refund policy?

A: Users are eligible for a refund within 7 days of purchase if they are not satisfied with the service. Refund requests after 7 days are not accepted.

Q: Can accounts be suspended?

A: Yes, accounts that violate terms of service, misuse the system, or engage in harmful activity may be temporarily or permanently suspended.

Q: Are there usage limits?

A: Depending on the subscription plan, users may have limits on AI usage, ticket creation, or API requests.

7. AI CHAT LIMITATIONS AND ESCALATION RULES

Q: What should AI do when a user issue is complex?

A: If the issue is too complex or outside the AI's knowledge scope, the AI should suggest creating a support ticket for human assistance.

Q: Can AI access user personal data?

A: No, the AI does not access sensitive personal data unless explicitly provided within the session context.

Q: What types of questions should be escalated?

A: Billing issues, technical errors, account problems, and unresolved queries should be escalated to human support via ticket creation.

8. FREQUENTLY ASKED QUESTIONS (FAQ)

Q: How do I reset my password?

A: You can reset your password by going to the login page and clicking on "Forgot Password". A reset link will be sent to your registered email.

Q: How do I create a support ticket?

A: Go to the dashboard and click on "Create Ticket". Fill in the required details and submit the form.

Q: Why is my order or request delayed?

A: Delays may occur due to system processing time or high demand. Standard processing time is 24–72 hours depending on the request type.

Q: Can I upgrade my subscription plan?

A: Yes, users can upgrade their subscription plan at any time from the profile or billing section.

Q: How do I contact support?

A: You can contact support either through the AI assistant or by creating a support ticket for human assistance.
